

STH M16 COMPACT DAYCRUISER

Elegance and bold power on small space.

M16 is a compact glider, characterized by quickness and agility. The compact Daycruiser can easily be put on the trailer and works perfect for daytrips on lakes, rivers and lagoons. Naturally, the boat can be delivered with electric drive on owners demand.

Out of many, one major advantage of M16 is its stability and tranquility even at high speeds. May its focus be on nice weather, M16 is still prepared for the opposite. The roof can easily be closed and the technical equipment is fit to get you safely through night and rain.
